About This Game

It is a short but very interesting horror, about a man who woke up in his own grave, next to his family.

In the past, he was a very bad man, he is confused and cannot make a choice between good and evil.

Our goal is to help the protagonist to make a choice between good and evil.

Only you will be able to choose good or evil, and only you can decide his fate.

The game has multiple endings, or rather two, good and bad. The ending in the game will depend on your actions.
